DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on July 1, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 6,752,829 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 1-14 are allowed. The following is an examiner's statement of reasons for allowance:

It is known in the medical industry to form an implantable stent prosthesis having a sidewall comprising a plurality of struts and an outer covering layer or channel material, as shown for example by Banas (US '348) and Sogard (US '573). In these instances, though, the prior art references of record fail to form a channel in said prosthesis in accordance to the limitations of the claimed invention. In particular, the claimed method requires that the channel be formed by covering a tube or mandrel with said channel material, exposing the thus formed assembly to a treatment, either heat, chemical, or adhesive, and attaching the channel to the sidewall. It is noted that the general technique of providing a "channel" to promote the delivery of a drug in a stent prosthesis is known; however, one of ordinary skill in the art at the time of the invention would not have found it obvious to practice the specific method of the claimed invention to obtain a channel in either one of Banas or Sogard as the prior art references of record fail to disclose, teach, or suggest the claimed method of forming a channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
